What if my audio files are not playing on my computer?

More than likely, it is because you are using a version of [Adobe's Flash Payer](#) that is not currently compatible with our audio files. We currently use a player that conflicts with the latest player, [Flash 10](#). However we are in the process of upgrading to Flash 10. You may also feel free to download the last [Flash 9 version](#), in order to hear these files for now. Thanks for asking.

First, we provide books via Amazon, Barnes & Noble, or via our iFOGO Store.

author/publisher to sell his/her book(s) directly to you, and to autograph said purchases.

Of course, you always have the option to purchase from Amazon, through iFOGO.com. Your payments are held until you have received your titles. In many respects, we function much like Ebay, on that score. If your titles are not received, as ordered, your payment is not processed to the sender.
